## A. Overview of NCC-Managed Electronic Informed Consent

The StrokeNet Standard Operating Procedure (SOP) ADM 24 Central Electronic Informed Consent Process describes electronic informed consent (eIC) in detail. If you are using the StrokeNet National Coordinating Center (NCC) managed eConsent through University of Cincinnati REDCap, you have agreed to follow these procedures.

The following is a summary of the NCC responsibilities, site responsibilities and the general eIC process:

1. The StrokeNet (NCC) will create a REDCap database for each trial and a unique form by site for every version of an informed consent form.
2. The NCC will ensure and verify that the most recent site specific CIRB-approved version of the informed consent is available in REDCap for eICD use.
3. The NCC will provide the site with their CIRB approval to use the central eIC process and access to their study-specific and site-specific link in REDCap.
4. The site will designate a primary and back-up user to have access to their site-specific eICD link in REDCap. These users will be responsible for distributing the link to the wider study team.
5. When an eICD Remote Consent Attestation is required the site's designated individuals who have access to REDCap will be responsible for ensuring the attestation is completed by the person who obtained consent within 24 hours of participant/LAR signature. This form and the signed eICD will be maintained for each participant in REDCap.
6. The PDF versions of both documents, as applicable, are combined and uploaded to WebDCU within 5 days of signature.
7. A hard copy of the completed eICD and Remote Consent Attestation Form (if applicable) will be kept at the site with the subject's research record.
8. If applicable, the site standalone HIPAA Authorization will also be obtained electronically through the REDCap platform and is signed in the same manner as the electronic informed consent document (eICD).

## B. When to Use eIC

The eIC process may be implemented when obtaining consent in-person or remotely. In both cases, the eICD takes the place of a paper ICD. Access to a smartphone, tablet or computer with Wi-Fi or cellular internet connectivity is required.

### 1. In-person Consent

It is preferred that the eICD is utilized during an in-person consent conversation over a paper ICD. During a traditional in-person consent conversation, the eICD is shared with the participant or legally authorized representative (LAR). All pertinent aspects of the study and HIPAA Authorization are reviewed by the study team member during the face-to-face conversation. If the participant/LAR elects to participate, they complete and sign the eICD using a mouse or touch screen. The person obtaining consent and the witness, when required, also completes and signs the eICD in real time.

### 2. Remote Consent

Remote consent describes the process of obtaining and documenting informed consent when the participant/LAR and the person obtaining consent are not physically in the same location. For remote eIC, the study team shares their REDCap link with the participant/LAR via text or email. The study team contacts the participant/LAR to ensure they are able to open and view the eICD, and then proceeds with the informed consent discussion. If the participant/LAR elects to participate, they

complete and sign the eICD using a mouse or touch screen. The person obtaining consent subsequently completes a remote consent attestation form (Section D.5.3) within 5 days of the participant/LAR signing the eICD. Using an impartial witness will not be feasible during the remote consent process.

## **C. How to Set Up REDCap eIC**

### **1. StrokeNet NCC**

The StrokeNet NCC is responsible for creating a REDCap project for each site and ensuring the most recent cIRB-approved version of the ICD is available for eIC use. After a site sends the NCC their completed ASPIRE Remote and Electronic Informed Consent Implementation Form indicating their request to use the central eIC process, the NCC provides each site access to their study-specific project and site-specific REDCap link. Sites do not need to wait for their cIRB acknowledgement of the Implementation Form to use the central eIC process.

The NCC provides the DOA-assigned primary study coordinator (PSC) and designated back-up with login credentials for the University of Cincinnati REDCap system so they have access to their site-specific eIC project.

### **2. CCHMC REDCap Access**

For individuals who do not have access to CCHMC REDCap, a self-request survey can be filled out here: <https://redcap.research.cchmc.org/surveys/?s=RE8EHCK9YH> When asked, 'Would you like to inform another person of your REDCap Account Creating and REDCap Username', please respond 'Yes' and enter ASPIRE@yale.edu – this will allow us to add you as a user to your ASPIRE eConsent project.

For individuals who have access to the CCHMC REDCap, you can login at the following link: <https://redcap.research.cchmc.org>. Ensure Cincinnati Children's Hospital Medical Center is selected under the Select your identity provider section, then click Go to Login page button. REDCap will redirect you to the CCHMC federated login page. Enter your CCHMC credentials (individual's email address) and click Login. As of January 2022, CCHMC REDCap will use Multi Factor Authentication (MFA) and users will be prompted to use Duo for authentication. Sites will need to set up Duo MFA Registration to get their account ready: <https://mfa.research.cchmc.org> (please refer to step by step instructions here: <https://confluence.research.cchmc.org/display/RESITHUB/Duo+MFA+Registration>). Once authenticated with CCHMC, users will be redirected back to REDCap.

### **3. Clinical Performing Site (CPS)**

It is the responsibility of the study team to assign a second team member access to the site-specific REDCap eIC project as a back-up for the PSC. The study team should communicate with the NCC Project Manager to request login credentials for the back-up and should notify the NCC Project Manager if there are changes to the personnel with REDCap access.

## **D. How to Use eIC**

The StrokeNet NCC provides each Clinical Performing Site (CPS) with a unique URL that links directly to the site-specific REDCap eICD. Each eICD will be an exact copy of the cIRB-approved ICD for that CPS.

Ctrl+click on following link to view the template eICD for ASPIRE:

[https://redcap.link/ASPIRE\\_eConsent\\_Template](https://redcap.link/ASPIRE_eConsent_Template)

## 1. Accessing your REDCap eIC Project

The StrokeNet NCC provides each CPS with a unique URL. Individuals who have access to REDCap may also obtain their URL at any time by clicking 'Survey Distribution Tools' in their site-specific eIC project.

To obtain the survey link, copy the URL below and paste it into the body of an email message in your own email client. Your email recipient(s) can then click the link to begin taking your survey.

Public Survey URL:  

## 2. Completing the eICD

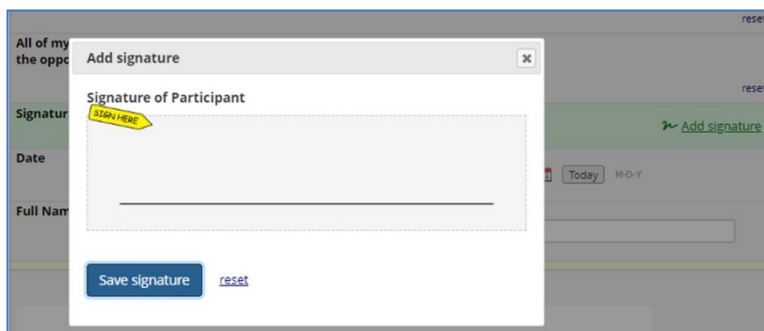

### 2.1 General

Prepopulating the eICD survey with participant information prior to sending to the participant/LAR is prohibited.

After reviewing the informed consent language in its entirety with the person obtaining consent, the participant/LAR will enter information into the ICD if they choose to participate in the study. The study team member obtaining consent should guide the participant/LAR through the form to ensure all fields are completed correctly.

If the participant/LAR mistakenly exits the eICD by closing the web browser, they must use the link to re-enter the eICD and start the form over again.

In order to complete the signature field, select 'Add signature' and a pop-up window allows a free-hand signature using a finger, stylus or mouse. The date of signature may be entered by clicking the 'Today' icon that will auto-populate the current date according to the device on which the eICD is completed.

### 2.2 Response Fields in eICD

The following response fields appear at the end of page 1:

<b>Participant Name:</b>	<input type="text"/>
<b>Telephone Number:</b>	<input type="text"/>
<b>If applicable, Legally Authorized Representative Name:</b>	<input type="text"/>
<b>Legally Authorized Representative Telephone Number:</b>	<input type="text"/>

The following response fields appear at the end of the main consent for trial participation:

<b>Is the patient able to give consent for himself/herself to participate in the study?</b>	<input type="radio"/> Yes <input type="radio"/> No/Using Legally Authorized Representative	reset
---	---	-------

- If the participant gives consent for himself/herself, the response to the question should be marked 'Yes'. If LAR gives surrogate consent for the participant, the question should be marked as 'No/Using Legally Authorized Representative'.

<b>Are you signing this consent in person (at the hospital with study staff) or remotely?</b>	<input type="radio"/> In-person <input type="radio"/> Remote/via tele-medicine	reset
---	---	-------

- The participant/LAR indicates whether they are completing the eICD in-person with the studyteam, or remotely. Remote consent indicates that the participant/LAR and the study staff are not physically in the same location.

If the participant/LAR is remote to study staff, signature lines will not populate for the study team member to sign the eICD. In this scenario, a remote consent attestation will be completed retrospectively (Section D.5.3).

<b>All of my questions have been answered, and I have been given the opportunity to decline this research.</b>	<input type="radio"/> Yes <input type="radio"/> No	reset
--	---	-------

- The participant/LAR must confirm that all of their questions have been answered for the signature fields to appear on the form. Depending on if the participant or LAR is giving consent, the appropriate signature lines will appear.

<b>Signature of Participant</b>	<input type="text"/>	<a href="#">Add signature</a>
<b>Date</b>	<input type="text"/>	Today M-D-Y
<b>Full Name of Study Participant</b>	<input type="text"/>	

Or

<b>Signature of Legally Authorized Representative</b>	 	<a href="#">Add signature</a>
<b>Date</b>	 	<input type="text"/>  Today M-D-Y
<b>Name of Legally Authorized Representative</b>	 	<input type="text"/>
<b>Legally Authorized Representative Relationship to the Participant?</b>	 	<input type="radio"/> Healthcare Power of Attorney <input type="radio"/> Spouse <input type="radio"/> Parent <input type="radio"/> Adult Child <input type="radio"/> Adult Sibling <input checked="" type="radio"/> Other
<b>If "Other" was selected above, please explain:</b>	 	<input type="text"/> <span style="float: right;">reset</span>

- The LAR should enter their full name and relationship to the participant. If the LAR selects 'Other', they should enter their relationship in the free text field that populates.

<b>Signature of person obtaining consent</b>	 	<a href="#">Add signature</a>
<b>Date</b>	 	<input type="text"/>  Today M-D-Y
<b>Name of person obtaining consent</b>	 	<input type="text"/>
<b>Is a witness required?</b>	 	<input checked="" type="radio"/> Yes <input type="radio"/> No <span style="float: right;">reset</span>
<b>WITNESS STATEMENT:</b> The participant or LAR was unable to read or sign this consent document because of the following reason: Check all that apply	 	<input type="checkbox"/> The participant or LAR is non-English speaking <input type="checkbox"/> The participant or LAR is illiterate <input type="checkbox"/> The participant or LAR is visually impaired <input type="checkbox"/> The participant or LAR is physically unable to sign the consent document <input type="checkbox"/> Other
<b>Signature of witness</b>	 	<a href="#">Add signature</a>
<b>Date</b>	 	<input type="text"/>  Today M-D-Y
<b>Name of witness</b>	 	<input type="text"/>

- If the participant/LAR completes the eICD in-person with study staff, the appropriate signatures lines will populate for the person obtaining consent to sign in real time. A question regarding need for witness will also appear and, if a witness is required, the appropriate signature lines will appear. Using an impartial witness will not be feasible during a remote consent process.
- If the participant/LAR gives consent, they should proceed to the Biobank Consent section. If any field (see exception below) is not completed, an error message will appear and the participant/LAR will not be able to advance to the Biobank consent section. (Exception: If LAR gives consent and either LAR name or telephone number is missing on page 1, advancing to the Biobank Consent section will be possible but a reminder to complete the field(s) will appear on the final page of eICD. If LAR is used, please confirm that there is no warning reminder on the final page before instructing LAR to submit the eICD.)

The following fields appear at the end of the Biobank Consent section:

	<input type="radio"/> Yes, I agree to participate in ASPIRE Biobank <input type="radio"/> No, I do not agree.	reset
<b>Signature of Participant/Legally Authorized Representative</b>		 <a href="#">Add signature</a>
<b>Date</b>	<input type="text"/>  Today M-D-Y	
<b>Full Name of Participant/Legally Authorized Representative</b>	<input type="text"/>	
<b>Signature of Person Obtaining Consent</b>		 <a href="#">Add signature</a>
<b>Date</b>	<input type="text"/>  Today M-D-Y	
<b>Full Name of Person Obtaining Consent</b>	<input type="text"/>	
<b>Signature of Witness</b>		 <a href="#">Add signature</a>
<b>Date</b>	<input type="text"/>  Today M-D-Y	
<b>Full Name of Witness</b>	<input type="text"/>	

The next form gives the participant/LAR an opportunity to review the responses they provided on the eICD. The participant/LAR may either return to the previous pages to change a response, or they may check the certification checkbox and submit the form.

I certify that all the information in the document above is correct. I understand that clicking 'Submit' will electronically sign the form and that signing this form electronically is the equivalent of signing a physical document.

If any information above is not correct, you may click the 'Previous Page' button to go back and correct it.

<< Previous Page      Submit

Save & Return Later

After submitting the form, the participant/LAR is prompted whether they would like to receive a PDF copy of the eICD.

- If 'Yes' is selected, a field requesting the email address to use appears. The PDF eICD will be sent to the email address provided.
- If 'No' is selected, it is the study team's responsibility to ensure the participant/LAR receives a paper copy of the ICD.

**WOULD YOU LIKE TO RECEIVE A PDF COPY?**       Yes  
 No      [reset](#)

**Email Address:**   
person requesting copy of consent

Submit

### 3. Completing the Stand-Alone HIPAA Authorization (if applicable)

The StrokeNet NCC will be responsible for integrating each CPS-specific HIPAA Authorization Form into the REDCap eIC project. Similar to the eICD, HIPAA will be an exact copy of the CIRB-approved paper HIPAA Authorization. Upon completion of the eICD, the project will automatically navigate the participant/LAR to the HIPAA Authorization form.

After reviewing the HIPAA Authorization language in its entirety with the person obtaining consent, the participant/LAR completes the signature and date fields. All other information fields automatically copy over from the responses on the eICD.

Similar to the eICD, the participant/LAR is asked to certify and submit their responses, and they are prompted whether they would like to receive a PDF copy of the HIPAA Authorization form.

#### 4. Automated Emails

##### Participant/LAR

If the participant/LAR elects to receive a PDF of the signed eICD and HIPAA Authorization form, automated emails are sent to the email address entered on the eICD with those documents as attachments. The email is sent securely through the Cincinnati Children’s Hospital network.

**Please note**, if the participant/LAR indicates “No” to the question regarding receipt of a PDF copy, the eICD and HIPAA are not be sent to them automatically. In this case, it is the responsibility of the study team to ensure the participant/LAR receives a paper copy of the ICD and HIPAA.

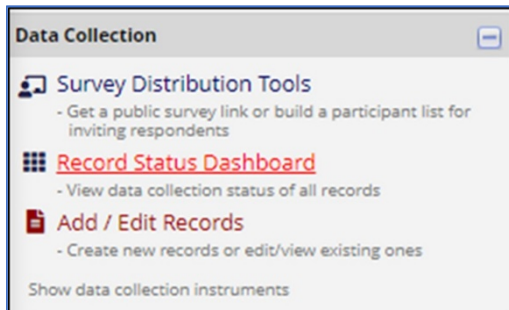

#### 5. Post-Consent Procedures

##### 5.1 Subject ID

Once a participant/LAR completes the eIC, REDCap creates a new record with an automated numbering system (beginning with 1 and incrementing by 1 for sequential records).

After consent is obtained, it is the responsibility of the CPS study team to obtain a WebDCU generated Subject ID for the participant. This subject ID should be entered into the form ‘WebDCU Subject ID’ in REDCap for the subject. This subject ID will be appended to the REDCap ID automatically to link the numbers (e.g., 1 (1054)).

Log into REDCap account and access the Record Status Dashboard and click on the ‘WebDCU Subject ID’ form for the subject. Enter the Subject ID and change form status to ‘complete’.

Record ID	ASPIRE eConsent	eConsent PDF	Remote Consent Attestation	WebDCU Subject ID
<a href="#">1</a> (1023)	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<a href="#">2</a> (1077)	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
<a href="#">3</a> (1098)	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

##### 5.2 Remote Consent Attestation

If the person obtaining consent and the participant/LAR are not in the same physical location, it is not possible for both parties to sign the eICD in real time. Therefore, the person obtaining consent must subsequently attest that all elements of the informed consent process were completed by signing a remote consent attestation form.

It is the responsibility of the PSC or back-up to manage completion of a remote consent attestation form for any participant enrolled using remote eIC. All fields on this form are required to be completed within 5 days of the participant/LAR signing the eICD.

**Remote Consent Attestation**

Invitation status: [envelope icon]

Editing existing Record ID 3 (1098)

Record ID 3

**Statement of Informed Consent Process Using eConsent**

1. Consent was reviewed with the subject and/or LAR including, but not limited to, risks and benefits, and the right to withdrawal from the study at any time without consequences.
2. All questions were answered by the study team.
3. Subject eligibility was confirmed per inclusion and exclusion criteria with data available at the time of consent.
4. The subject and/or LAR consented to participate in the ASPIRE clinical trial and signed the consent form.
5. A copy of the signed consent was given to the subject and/or LAR and a copy was placed in the patient chart.
6. Proper consent process was completed prior to beginning of study procedures.

[Add signature]

Survey options dropdown menu:

- Open survey
- Log out + Open survey
- Compose survey invitation
- Survey Access Code and QR Code
- Survey Queue

- The individual with REDCap user permissions can either open the form for the person who obtained consent to complete in-person, or they can send that person a link to complete the attestation form online. To do this, click on the 'Remote Consent Attestation' circle for the appropriate subject record in the Record Status Dashboard.
  1. Click on 'Survey options', then select 'Open survey' from the drop-down list.
  2. This opens the subject-specific remote consent attestation form in a new window. The web address in the new window can be shared with the person who obtained remote consent.
  3. The option to 'Compose survey invitation' may also be used. The user will be prompted to enter the email address of the person who should receive the invitation to complete the form. An automated email with the web link is sent through the REDCap system.

### 5.3 PDFs for WebDCU Upload

A PDF file of the completed eICD is uploaded to WebDCU for remote monitoring according to standard data management procedures. The eICD is considered complete once the signature of both the participant/LAR and the person obtaining consent are captured. When eIC occurs remotely, the eICD is complete once the remote consent attestation form is completed.

To download and print a PDF of a completed eICD in REDCap:

1. From the 'File Repository' > click on the 'PDF Survey Archive' > download the ASPIRE eConsent PDF for the appropriate participant.
2. If consent was obtained remotely or other stand-alone documents exist for the site, follow the same steps for the 'Remote Consent Attestation' form or any stand-alone documents. Combine eICD and all other forms if applicable into one PDF document for upload to WebDCU.
3. These PDFs should also be printed and kept with the subject's research record.

Displayed below are PDF files that have been automatically captured and stored by the PDF Auto-Archiver setting, which has been enabled by one or more surveys on their Survey Settings page. Only users with 'Full data set' data export privileges will be able to download the archived files. Note: The PDFs below were archived when a participant completes a survey, which means they might be different from other downloadable PDFs in the project that are generated on demand using the current data.

Search

Survey Completion Time	Record	Survey	Identifier (Name, DOB)	IP Address	Version	Type	Download
12/10/2021 10:42am	88 (1555)	Remote Consent Attestation		74.215.156.95			
12/10/2021 10:41am	88 (1555)	ASPIRE eConsent		74.215.156.95			

#### 5.4 Incomplete Records

A participant/LAR generates a new eIC record in REDCap when any data is entered into the form. If the participant/LAR mistakenly exits the eICD by closing the web browser, they must use the link to re-enter the eICD and start the form over again. In this case, two REDCap records are generated for the same participant/LAR. It is the site's responsibility to ensure the appropriately completed eICD is uploaded to WebDCU for remote monitoring.

## E. Contacts

### 1. Reference Documents

Please reference the following documents that support a comprehensive overview of the centrally managed eIC process.

- StrokeNet SOP ADM 24 Central Electronic Informed Consent Process ([https://www.nihstrokenet.org/sop\\_gcp](https://www.nihstrokenet.org/sop_gcp))
- CIRB eConsent Webinar FAQs 2020-06-02

### 2. NCC Project Manager

The NCC Project Manager for each trial will be the main contact for questions regarding eIC using REDCap. NCC PM responsibilities include:

- Creating accounts and updating permissions for primary and secondary users at each site.
- Ensuring the most recent version of the informed consent is used for the eIC
- Answering questions about navigating REDCap and managing eIC records.

### 3. REDCap Helpdesk

For username and/or password issues, contact the REDCap helpdesk, [help-redcap@bmi.cchmc.org](mailto:help-redcap@bmi.cchmc.org). The helpdesk should ONLY be contacted if you are having trouble logging in. If you do not remember your password, use the 'Forgot Password' self-service portal.

## F. Document History

Version	Description of Modification	Issue Date
2.0	Addition of time frame for completing remote attestation form. Addition of site responsibility for keeping hard copy of completed eICD Addition of language to never prepopulate survey prior to distribution to participant/LAR Removal of responsibility to provide fully translated eICD Change of process on how to pull completed eICD and other associated documents.	12/10/2021
